

Corporate social responsibility

We believe that sustainable success on the financial level goes hand in hand with an ambitious social and environmental programme.

All employees of VINCI Energies endorse the principles of our parent company VINCI for corporate social responsibility. As almost of our projects are in the public interest, we feel our duty to engage in dialogue with our public and private partners about our role in society and the social and environmental impacts of our activities. The VINCI principles of social responsibility contain obligations that our employees are conscious of during everyday work.
